SUMMARY

Data analyst and mathematician who can communicate complex ideas to technical and non-technical audiences alike. Highly motivated to move into a full-time data analyst role where I can leverage my strong analytical and coding skills. Please look at [my portfolio](#) to see my capabilities.

SELECTED DATA PROJECTS

Mobile Gaming Data Analysis [[full project](#)]

- Cleaned, queried, and visualized gaming data using PostgreSQL and Python; performed hypothesis testing and regression analysis to identify which user attributes correlated most strongly with higher scores

Craigslist Web Scraper [[full project](#)]

- Built a Python web scraper to curate a dataset on competing math tutoring prices; used PostgreSQL and Tableau to analyze the competition and justify a 25% increase in hourly rates

Television Ad Campaign Report [[full project](#)]

- Wrote a Python script that cleans data and calculates important metrics; summarized the findings in a presentation that provides guidance on TV networks where ad spend should be increased or decreased

Reddit Accounting Exploratory Data Analysis [[full project](#)]

- Cleaned and visualized Reddit survey data using Python & Tableau; built regression models to quantify relationships between salary and other factors to determine the optimal career path for a new accountant

Scholarly Article Analysis [[full project](#)]

- Performed A/B testing, confidence interval analysis, and linear regression modeling using data from a scholarly article to understand acupuncture treatments and their effects on hypertension

Pokémon Legendary K-Nearest Neighbor & Logistic Classifiers [[full project](#)]

- Built and trained models using game data that can predict if a Pokémon is legendary with 92-94% accuracy

R To Python [[full project](#)]

- Ported R code to Python from recently released chapters of the textbook *Introduction to Statistical Learning*

PROFESSIONAL EXPERIENCE

Fusion Academy

Math Teacher

Los Gatos, CA

September 2016 - Present

- Instruct students in a 1-on-1 learning environment focusing on developing strong quantitative analysis skills
- Teach statistics, calculus, Python, trigonometry, and advanced algebra to students across all levels of familiarity
- Have been praised in every yearly review as having excellent (highest rating given) content knowledge
- Recognized in over 90% of quarterly reviews for explaining high-level concepts in ways that are easy to digest

Underground Communications

Reporting Analyst

San Jose, CA

September 2011 - September 2016

- Wrote 100s of reports in Excel summarizing property damage in over 30 regions for distribution
- Maintained the lowest error rate among all ten employees in the company
- Regularly completed ad hoc reporting requests for clients using a variety of public & private databases
- Wrote script to restart listening stations automatically, reducing rate of missed leads by 10%+ per month

EDUCATION

San Jose State University

Bachelor of Science, Business Administration - International Business

San Jose, CA

2011

SKILLS, CERTIFICATIONS & MISCELLANEOUS

Skills: Python, SQL, R, Tableau, Excel, Google Cloud Platform, Airflow, Google BigQuery, Docker, Git

Certifications & Classes: SQL Intermediate: HackerRank (2022), MySQL Bootcamp: Udemy (2021), Data Science: San Jose City College (2020), Python Programming: Evergreen Valley College (2020), Computational Thinking & Data Science: edX (2020), Computer Science & Programming Using Python: edX (2020), Python For Data Analysis & Visualization: Udemy (2020)

Fun Fact: Led competitive Counter-Strike team in high school and won CA Amateur League Pro Division
